# Varinder Singh

**Full-Stack Developer** · B.C.A. student (2024–2027)

varindersinghofficial338@gmail.com
github.com/VarinderSingh68
Mohali, Punjab, India

## SUMMARY

Full-stack developer who has designed, built, deployed and sold a production e-commerce platform to a paying client, plus seven full-stack apps with live demos and admin panels. Comfortable across the stack — JavaScript and React front ends, Node.js/Express, FastAPI and PHP backends, PostgreSQL, and Linux server deployment. Looking for an internship or entry-level full-stack role.

## EXPERIENCE

### Freelance Full-Stack Developer

2026 – Present

Well Baked Bakery — Premium Cakes · chandigarhcakeclub.club

- Designed and built a production online ordering platform that replaced phone and WhatsApp ordering, with a live menu of **200+ products across 25+ categories** and size/weight-based pricing.
- Built a password-protected **no-code admin dashboard** for products, pricing, banners, coupons, orders and store settings — the owner runs daily operations without developer help.
- Automated order handling with **PDF invoice generation** plus WhatsApp and email notifications on every order; added a coupon system and menu badges.
- Deployed on a **Linux VPS** (Nginx reverse proxy, PM2, auto-renewing SSL) and **migrated the full catalog and order history with zero data loss**; provide ongoing features and support.

JavaScript · Node.js · Express · PostgreSQL · Nginx · PM2 · Linux

## SELECTED PROJECTS

### JS Autos — EV dealership website

PHP · Bootstrap 5 · Vanilla JS

Dealership site with a filterable 10-model catalog, test-ride booking, a petrol-vs-electric savings calculator and CSRF-protected forms.

### Pet Shop Business Growth Agent

PHP 8 · Tailwind · Alpine.js

E-commerce and booking platform with pet profiles for reorder reminders, bookable grooming/vet slots, and a “Growth Copilot” that surfaces reorder and upsell opportunities from order history.

### Doctor Business Growth Agent

React · Vite · REST API

Clinic booking platform with per-treatment pricing, calendar and time-slot booking, a separately deployed API with a live status indicator, and an admin dashboard.

### Bakery Business Growth Agent

React · FastAPI · PostHog

React storefront on a Python FastAPI backend (Swagger-documented) with variants, cart and live chat; admin panel with product analytics and exit-intent A/B testing.

### ARIA — AI agent platform

AI tool routing

Chat interface that routes requests to built-in tools (charts, documents, scripts, messages) and answers from uploaded files or URLs.

## AT A GLANCE

| | |
|---|---|
| **1** client platform sold & live | **8** full-stack apps shipped |
| **200+** products in production | **0** records lost in migration |

## IN PRODUCTION

JavaScript · HTML & CSS · Node.js · Express · PostgreSQL · Nginx · PM2 · Linux VPS

## IN PROJECTS

React · Vite · Python · FastAPI · PHP 8 · Tailwind CSS · Bootstrap 5 · Alpine.js · REST APIs · PostHog · Git & GitHub

## STUDIED

Java · MySQL · C / C++

Training and B.C.A. coursework.

## EDUCATION

**B.C.A.**
Gian Jyoti Institute of Management and Technology, Punjab · 2024–2027

**Web Development Training**
Speed Techno Training Institute, Chandigarh · 2024–Present

**Class 12 & Class 10**
Shishu Niketan Public School, Punjab · 2024, 2022
